

1690

375lpm, 1½" F BSP

An extremely heavy duty automatic nozzle for high flow, bulk fuel transfer for applications including rail, tanker or filling storage tanks.

- 30% lighter than similar models for easy handling
- Durable die cast aluminium nozzle body for heavier duty applications
- Right angle design allowing the nozzle to fit close to walls and corners
- Large hand opening to accommodate for gloves
- Check valve is in the nozzle body rather than spout to allow for inexpensive and fast serviceability
